

STRUCTURED NOTES

CAPTURE • ORGANIZE • UNDERSTAND • APPLY

Name Emmanuel Rivas
Course / Subject Fundamentos de Programación
Speaker / Class _____
Date & Time 10/7/26

KEYWORDS & KEY CONCEPTS

-
-
-
-
-
-
-
-

Focus on the key concepts that generate value and understanding.

ACTIONS / NEXT STEPS

- ☐
- ☐
- ☐
- ☐
- ☐

Turn knowledge into action.
Small steps, big results.

NOTES

Title: Lógica Matemática

Topic: Proposiciones

Una proposición o enunciado es una oración, frase o expresión matemática que puede ser falsa o verdadera, pero no ambas a la vez.

La proposición es un elemento fundamental de la lógica matemática.

QUESTIONS & REFLECTIONS

-
-
-
-
-

What questions do I have?

What is unclear or confusing?

What ideas connect?

How can I apply this?

What assumptions should I challenge?

SUMMARY

Write a brief summary of the main points.

-
-
-

KEY TAKEAWAY

Capture the most important insight.

-
-
-

NOTES

Title: Lógica Matemática
Topic: Proposiciones Compuestas

Existen conectores u operadores lógicos que permiten formar proposiciones "compuestas". Estas son compuestas cuando esta integrada por dos o más proposiciones simples conectadas.

Ejemplos de conectores lógicos básicos:

- Operador and (y)
- Operador or (o)
- Operador not (no)
- Operador or exclusivo (xor)

- ☐
- ☐
- ☐
- ☐
- ☐

 Turn knowledge into action. Small steps, big results.

NOTES

Title: Lógica Matemática
Topic: Proposición condicional ($\rightarrow$)

Una proposición condicional es aquella que está formada por dos proposiciones simples (o compuestas) P y q , y que se indica de la siguiente manera:

$$P \rightarrow q$$

Esto se lee "si P entonces q ".

QUESTIONS & REFLECTIONS

-
-
-
-

Turn knowledge into action.
Small steps, big results.

NOTES

Title: Lógica Matemática
Topic: Proposición bicondicional ($\leftrightarrow$)

Sean p y q dos proposiciones, entonces se puede indicar la proposición bicondicional de la siguiente forma:

$$p \leftrightarrow q$$

Esto se lee como "p y sólo si q" en donde la proposición ($p \leftrightarrow q$) es verdadera si p es verdadera solo si q también lo es.

QUESTIONS & REFLECTIONS
